

Dear,sirs

I have xm in my truck I travel from coast to coast it helps me alot with traffic and wheather so I will know what I am comming into. If I did not have it with me it takes awhile for local station to tell you the wheather and sometimes they don,t tell you about wrecks. With xm I will know if I need to change my route for a wreck or for a bad storm I will know if I need to pull over for saftey. With my xm I do not have to change my chanel every time I come into a new state I feel saftey is first than trying to change a station. I'm all for xm radio wheather and traffic reports I know ahead of time whats going on no matter what state I'm in. It will be a big shame if they take the weather and traffic reports off the air.

Thank you
